

*Can you sleep
by the side of the
"Braille Printer"?*

Simple to operate! The quietest printer! New sleek design!

The GEMINI Super printer has changed to a new rounded design. With reader friendly Braille and clear inkjet print, you can use it in many ways. Such as official documents from governments and education institutions, handouts, notices, etc... Now includes Ethernet ports for LAN networking. It's simple to operate, even easier to use!

New Gemini SUPER

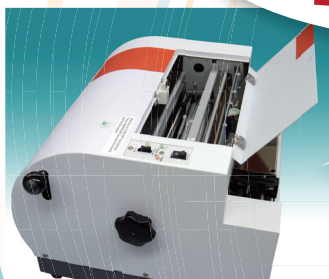

Print Braille and Ink Simultaneously on the Same Page

GEMINI Super can print Braille and Ink simultaneously on parallel lines of the same page. It is easy for weak sighted and senior citizens to see what is written. Just flip the paper and you can easily print on both sides.

Print at High Speed with Minimum Noise

The noise level has been greatly reduced by using Nippon Telesoft's high-tech printing method that actually pushes the Braille printing pins into the paper instead of striking the paper. This method also allows an entire line of Braille to be printed at the same time.

There is no longer the loud noise of embossing. You can feel free to use it, wherever and whenever.

As Nippon Telesoft's Braille Printer supports major languages around the world, it has many regular users all over the world.

By printing Ink Characters simultaneously, any user who doesn't read Braille can understand what is written and can communicate fast and easy with visually impaired people.
